CO-1_ASSESSMENT-2

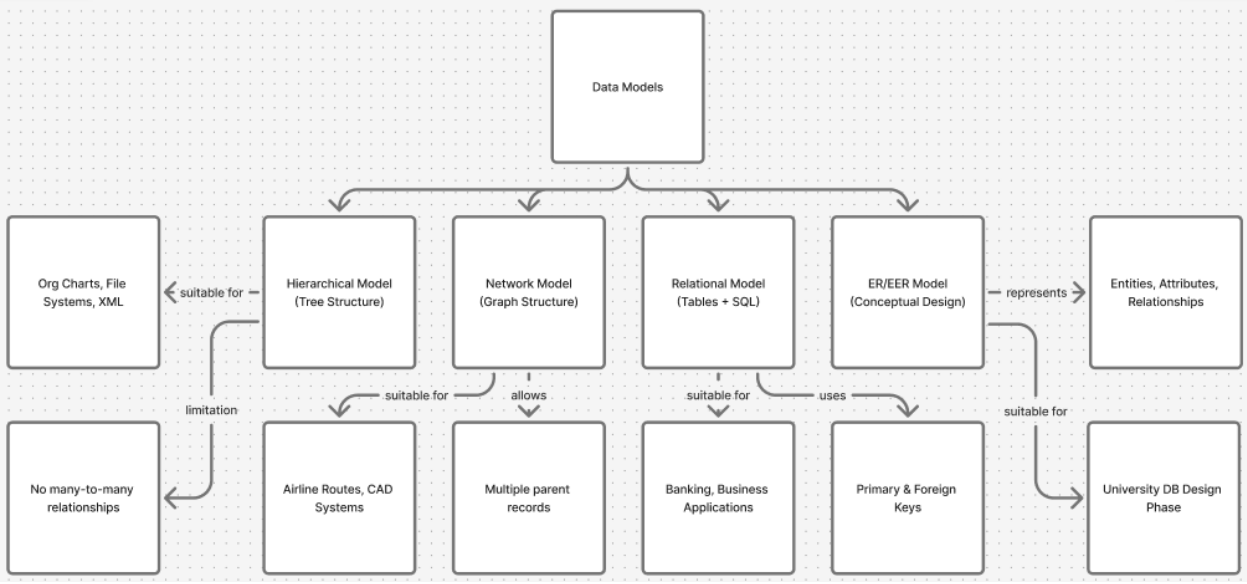

DATE:16/10/26

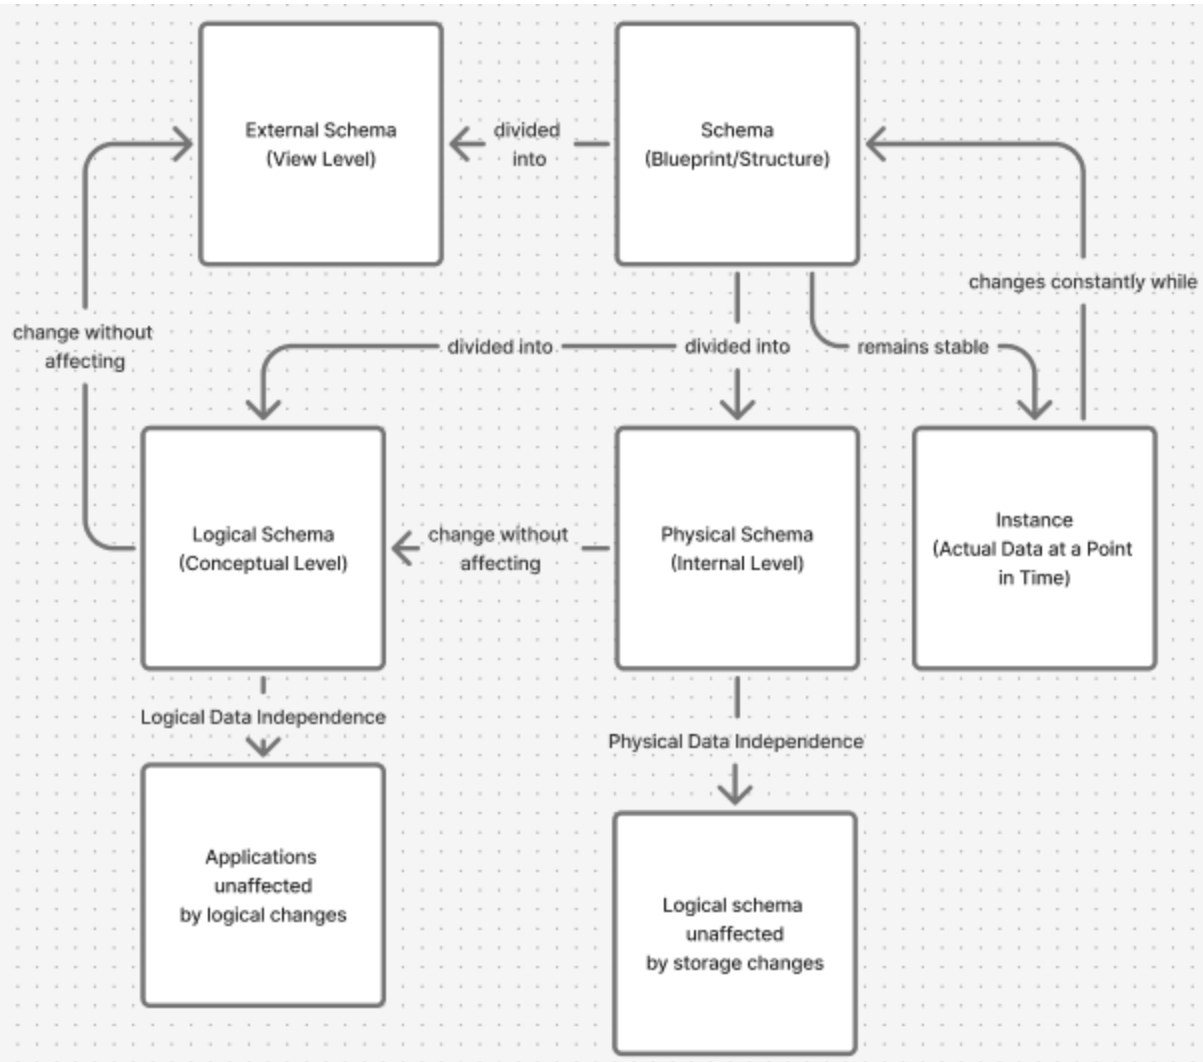

NAME:BHARANI. R .P

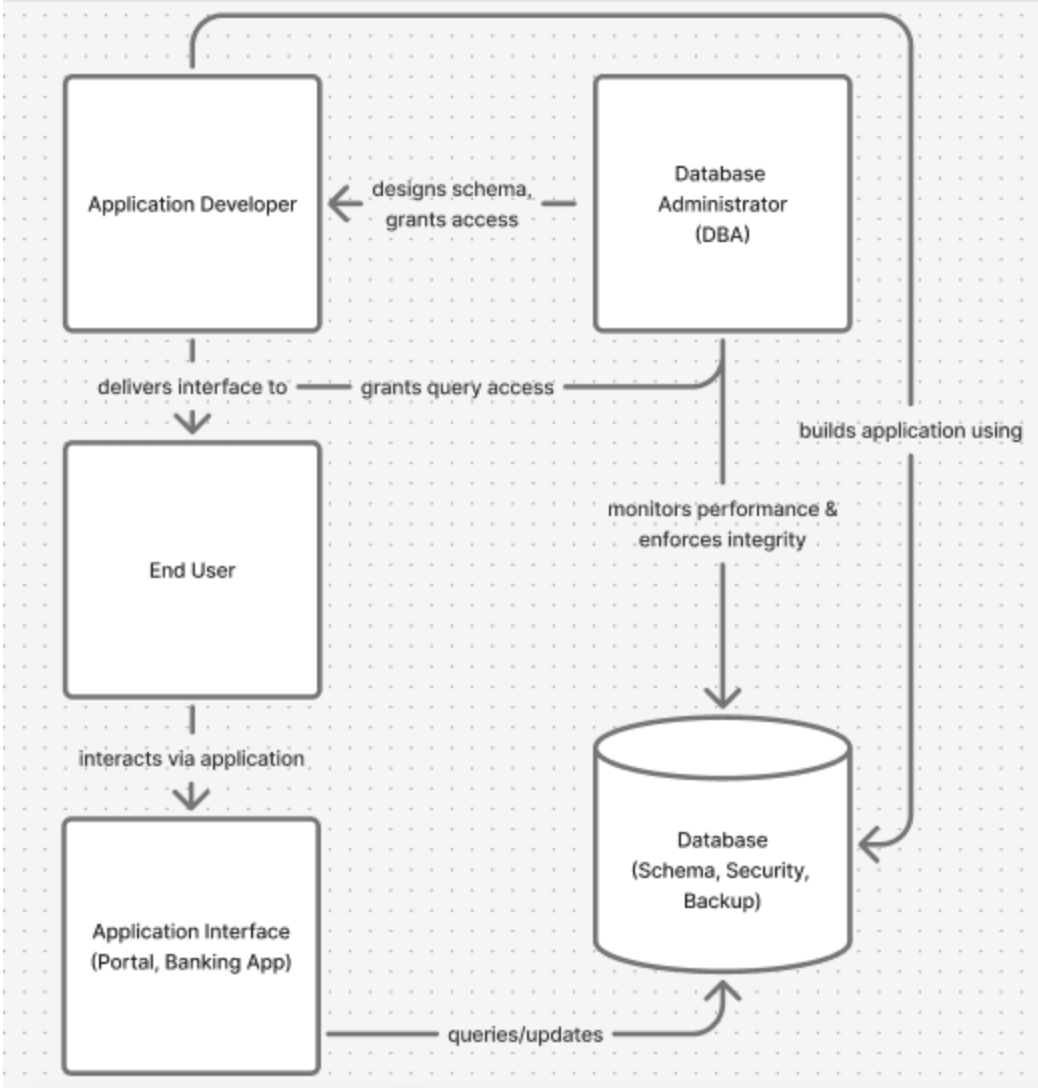

REG_NO:1925L26003

Query Processor
(Parse + Optimize)
generates SQL
User: Click 'View
Balance'
result assembled
execution plan
formatted result
Transaction Manager
(ACID, Concurrency
Control)
User: Balance
Displayed
controlled access
data retrieved
Storage Manager
(Buffer, Cache, I/O)
reads from
Database Files
(Disk: blocks, pages)
raw data

Data Models
Org Charts, File
Systems, XML
suitable for
Hierarchical Model
(Tree Structure)
Network Model
(Graph Structure)
Relational Model
(Tables + SQL)
ER/EER Model
(Conceptual Design)
represents
Entities, Attributes,
Relationships
limitation
suitable for
allows
suitable for
uses
suitable for
No many-to-many
relationships
Airline Routes, CAD
Systems
Multiple parent
records
Banking, Business
Applications
Primary & Foreign
Keys
University DB Design
Phase

External Schema
(View Level)
divided
into
Schema
(Blueprint/Structure)
changes constantly while
change without
affecting
divided into
divided into
remains stable
Logical Schema
(Conceptual Level)
change without
affecting
Physical Schema
(Internal Level)
Instance
(Actual Data at a Point
in Time)
Logical Data Independence
Physical Data Independence
Applications
unaffected
by logical changes
Logical schema
unaffected
by storage changes

Application Developer
designs schema, grants access
Database Administrator (DBA)
delivers interface to
grants query access
builds application using
End User
monitors performance & enforces integrity
interacts via application
Database (Schema, Security, Backup)
Application Interface (Portal, Banking App)
queries/updates
